

NAME	Vandall 1000 Bass Amplifier (Tube & Solid State)
KEY FEATURES	1000 W power two preamplifiers - solid-state and tube two separately powered 500 watt amplifiers MLO system
OVERVIEW	Class D bass amplifier with 1000 W power, consisting of two separately powered 500 W amplifiers. Equipped with a transistor and a tube preamplifier that offers extremely high dynamics of sound and high power while maintaining small dimensions.
FULL DESCRIPTION	<p>The Vandall-1000 is a unique design of two amplifiers in one housing. The amplifier is equipped with two independent, 500 watt power amplifiers. Each of the amplifiers has its own separate power supply. Two power switches allow using one or both amplifiers at the same time. Thus, the musician has at his disposal two 500 watt amplifiers that can be used freely depending on the needs.</p> <p>Both amplifiers share the same two channel (transistor and tube) preamp. The solid state pre-amp ensures great dynamic while the tube pre-amp provides a warm, soft sound. Both pre-amps can be steplessly mixed to offer the whole spectrum of desired sounds, from crisp and clear to slightly over driven tube.</p> <p>The Taurus Vandall-1000 is powered by two outstandingly efficient high energy (SMPS) Switching Mode Power Supply which ensures extremely high dynamics and power in a light weight and compact amp dimensions.</p> <p>The Taurus Vandall-1000 is equipped with the very effective and easy to operate MLO tone control system designed to find the right sound quickly. Tone setting characteristics are designed to reveal the real character of the particular instrument, meeting its both technical and musical parameters. Extra precise control over middle range is effected by a parametric equalizer and pre-amp filters switches. Even though the amplifier is operating in very low frequencies, the bass sound is still impressively selective.</p> <p>GAIN control VOLUME - control CHARACTER - fluent signal adjustment of the input between two sections of the amplifier - SOLID-STATE and TUBE</p> <p>MLO EQ TONE: BASS and TREBLE - equalizer with "MLO system" Triple BASS-switch - to reduce or boost low frequency [DBS-cut/OFF/DBS-boost] Triple TREBLE-switch - to reduce or boost high frequency [CUT/OFF/PRESENCE] MIDDLE with PARAMETRIC EQUALIZER - for precise control of middle range (250Hz-1,5kHz +/-12dB) MLO EQ - TECH INFO: BASS - 40Hz +/-12dB @600Hz +/-6dB BASS Boost/Cut - 60Hz +/-6dB TREBLE - 7kHz +15dB / 10kHz -15dB TREBLE Boost/Cut - 10kHz +8dB/-8dB</p>
PARAMETERS	
CATEGORY	BASS TUBE & SOLID STATE AMPLIFIER
POWER OUTPUT	1000 W
POWER STAGE EFFICIENCY	-
TUBES	-
SUPPLY VOLTAGE SELECTOR	-
IMPEDANCE	4 / 8 ohm
SPEAKERS IMPEDANCE AUTO DETECTION	-
SERIAL EFFECT LOOP	-
POWER BRAKE	-

LINE OUT	-
AUX	-
FOOT-SWITCH	-
MIX-MODE	-
HEIGHT (mm) (in)	66 2,60
WIDTH (mm) (in)	380 14,96
DEPTH (mm) (in)	275 10,83
HEIGHT (kg) (lbs)	3,5 7,72

MANUFACTURER	Taurus products are designed and hand-made in Poland. Adam Kozakiewicz, the founder of Taurus Amplification, musician, sound engineer and electronics engineer, has been providing the market with the best and fully professional music equipment for 35 years. Manual processing and control, guarantee the best quality and full satisfaction.
