

NAME	Lightweight bass cabinet Q-210 500 W 2x10"
KEY FEATURES	2 x 10 " neodymium speakers a minimum of self-resonance housing high efficiency ultra-light durability
OVERVIEW	Bass cabinet equipped with two 10 " neodymium speakers. The housing is made of ultra-light plywood and the reinforcements of the structure guarantee a minimum of internal resonance.
FULL DESCRIPTION	<p>The Q-210 cabinet for bassists who prefer the sound of 10-inch speakers. The parameters of such loudspeakers are perfect for different styles of music. In order to meet the expectations of musicians, we chose the loudspeakers with very good acoustic properties: high dynamics, high power and faithful sound transmission. The cabinet housing is made of very light plywood from the exotic OKUME tree. The construction of the cabinet is specially strengthened with dividers connecting all the walls. Such construction helps to eliminate the resonance of the housing. The sound in the low frequency range is not accompanied by an additional delay caused by oscillation of the casing. It increases the selectivity and gives a quick response of the cabinet to the sound during the dynamic playing.</p> <p>The Q-210 is equipped with SPEAKON + JACK combo outputs and a 3-position tweeter switch. There are the special holes on the top of the housing that allow for convenient placing of the cabinets on the top of each other. The cabinet housing is covered with hybrid polyurethane coating. The coating is extremely resistant to any kinds of mechanical damage which may occur during transportation as well as protects the cabinets against moisture. It is also very easy to clean . An additional advantage of the coating with the polyurethane elastomer is a sealing and reinforcement of the entire cabinet's structure, thus eliminating undesirable vibrations as well as increasing the overall cabinet's lifespan.</p>
PARAMETRY	
CATEGORY	BASS CABINET
NUMBER OF SPEAKERS	2
SPEAKER SIZE	10"
SPEAKER TYPE	Neodyme + Tweeter
IMPEDANCE	8 ohm
SENSITIVITY	100 dB
POWER HANDLING	500 W
POWER STAGE EFFICIENCY	
POWER OUTPUT WITHOUT ADDITIONAL SPEAKER	
ENCLOSURE	
FREQUENCY RESPONSE	45Hz-18kHz
CONNECTORS	combo SPEAKON + JACK
HEIGHT (mm) (in)	495 19,49
WIDTH (mm) (in)	495 19,49
DEPTH (mm) (in)	370 14,57
HEIGHT (kg) (lbs)	14,7 32,41
WARRANTY	2
MANUFACTURER	<p>Taurus products are designed and hand-made in Poland. Adam Kozakiewicz, the founder of Taurus Amplification, musician, sound engineer and electronics engineer, has been providing the market with the best and fully professional music equipment for 35 years. Manual processing and control, guarantee the best quality and full satisfaction.</p>
