

NAME	DEXTER - Polyphonic Octaver
KEY FEATURES	Transpose to upper or lower octave possibility to mix both octaves simultaneously TRUE BYPASS Autodetection of voltage polarization
OVERVIEW	The DEXTER MK-2 is an octave that allows polyphonic sound transposition to the upper and lower octaves. Both octaves can be freely mixed with the instrument signal, using only the upper or lower octaves and both octaves simultaneously. The polyphony is provided by a high-quality 24-bit DSP processor.
FULL DESCRIPTION	<p>The Dexter is a polyphonic OCTAVER which allows transposing an original note of one octave up and down. Both octaves can be used separately, mixed together as well as mixed with the original notes.</p> <p>The 24-bit high quality DSP is responsible for polyphony of the effect. Each octave is controlled by two potentiometers: Level & Range. Thanks to them, unwanted tones which sometimes occurs in octaves can be eliminated e.g. blurred clarity of sound or extensively altered sound of the instrument.</p> <p>In practice it turns out that broadband signal processing by OCTAVER in certain situations may be unwanted. The bandwidth range potentiometers gives great precision, flexibility and freedom in shaping the sound of the instrument.</p> <p>DC assistant - protection against signal loss. If disconnected or the voltage is lower then 6V the effect is automatically switched to the "bypass" mode</p> <p>Polarity Auto Detection - allows using either centre-positive or negative polarity on power supply</p> <p>TRUE BYPASS - in OFF mode your instrument's original signal goes through, bypasses all electronic components</p>
PARAMETERS	
CATEGORY	GUITAR EFFECT
POWER SUPPLY	9-12 V
TRUE BYPASS	YES
FOOTSWITCH	YES
COMPRESSOR	-
DC ASSISTANT	YES
POLARITY AUTO DETECTION	YES
HEIGHT (mm) (in)	65 2,56
WIDTH (mm) (in)	96 3,78
DEPTH (mm) (in)	144 5,67
HEIGHT (kg) (lbs)	0,5 1,1
WARRANTY	2
MANUFACTURER	Taurus products are designed and hand-made in Poland. Adam Kozakiewicz, the founder of Taurus Amplification, musician, sound engineer and electronics engineer, has been providing the market with the best and fully professional music equipment for 35 years. Manual processing and control, guarantee the best quality and full satisfaction.
