

<b>NAME</b>	<b>Bass Speaker Cabinet TS-210F (hc) 300Watt 2x10"</b>
<b>KEY FEATURES</b>	<p>2 x 10 " SICA neodymium speakers  minimum housing self-resonance  high efficiency  small dimensions  durability</p>
<b>OVERVIEW</b>	Bass cabinet equipped with two 10 " Italian SICA speakers. Multiplex housing and structural reinforcements guarantee minimum housing resonance. Perfect for stage and studio conditions.
<b>FULL DESCRIPTION</b>	<p>The TS-210F cabinet is equipped with classic ferrite speakers made in Italy by SICA. Designs based on two 10" speakers are most preferred by bassists. Their quick response, dynamics and frequency response makes them suitable for various musical styles. To meet the musicians' expectations we chose speakers with excellent acoustic properties - high dynamics, high power, and very accurate frequency response.</p> <p>An additional advantage of the TS-210N cabinets is its compact dimensions, what makes a huge difference when must be transported. The vertical setting of the speakers in cabinet provides a good monitoring on the stage and cabinet itself takes less space.</p> <p>All "Hc" Series cabinets are covered with hybrid polyurethane coating. The coating is extremely resistant to any kind of mechanical damage which may occur during transportation as well as protects the cabinets against moisture. It is also very easy to clean . An additional advantage of the coating with the polyurethane elastomer is a sealing and reinforcement of the entire cabinet's structure, thus eliminating undesirable vibrations as well as increases the overall cabinet's lifespan. All the cabinets are equipped with special assembly inserts for safe stacking of amp or other speaker.</p> <p>The cabinet is fitted with SPEAKON + JACK (1/4") combo connectors and three-way tweeter volume control. All the cabinets are equipped with special assembly inserts for safe stacking of amp or other speaker.</p>
