**Thank you for choosing our SERVO Enhancer.
Hopefully it will become the main tool in the arsenal
of your effects,
creating your own original guitar sound.**

The **SERVO** is a professional tool to help you achieve great guitar sound. The device makes the sound very vivid and saturated while it does not interfere with the original guitar sound.

The SERVO enriches the sound of instrument, adding the qualities which make playing more enjoyable and even more importantly, more inspiring. Additionally, it makes the guitar very well set in the overall band mix.

The SERVO is designed to work with any type of traditional and digital profiling amplifier and preamp. It also performs very well while recording guitar directly to the computer. The unit is extremely easy to use - it is recommended to connect it directly to the guitar as a first component of the entire effects chain.

Specifications:

- SERVO GAIN - adjustment.
- BOOST - increases output signal level and makes sound slightly "crunchy".
- TRUE BYPASS - in OFF mode your instrument's original signal goes through, bypasses all electronic components.
- POWER SUPPLY VOLTAGE RANGE 9-15V:
any power supply with power rating between 9 and 15V can be used
- POLARITY AUTO DETECTION:
allows using either centre-positive or negative polarity on power supply
- DC ASSISTANT: protection against signal loss.
If disconnected or the voltage is lower than 6V the effect is automatically switched to the "bypass" mode
- Current consumption: 40mA (max)
- DIMENSIONS: (H x W x D) 50 x 66 x 110mm
- WEIGHT: 0,2kg
