

NAME	Tube Amp Stomp-Head 5 CE 90Watt
KEY FEATURES	Power 90W small and light structure usage as a guitar preamp usage as a head possibility of installation in a pedalboard
OVERVIEW	Small, lightweight analog guitar amp with great power. Stomp-head is the answer to the combo or standard head dilemma. It can be used as a guitar preamp without connecting a loudspeaker.
FULL DESCRIPTION	<p>Until today, guitarists could only choose between two types of amplifiers: heads and combos. Now, we are introducing a completely new breed: The Stomp-Head.</p> <p>The SH-5 .CE is an extremely light and small but still powerful and great sounding guitar amplifier. The amplifier can be placed either on a stage floor just beside the effects, in a traditional way as a head amp, on the top of the speaker cabinet, or set up on an effect board. It features 5 built-in foot switches enabling control all functions while in use. When the amp is positioned as a "Head", in order to control all it's function an external foot controller can also be connected.</p> <p>Each channel represents different sound characteristics which give a great freedom in obtaining a desired sound's texture of the instrument. The amp is designed to produce a wide arrey of different sounds. From a classic, clean jazzy sound throughout modern DRIVE, up to heavy saturated HIGH GAIN like distortion.</p> <p>Other than a regular three point EQ (BASS, MIDDLE, TREBLE) each channel is equipped with MID/RANGE switches which are designed to change the range of the MIDDLE frequencies. This option is very useful in proper setting of the guitar's sound in a bands overall mix depending on the style of music played and type of guitar used. Additionally the highest frequency range of the guitar can be altered by the BRIGHT/DARK switch.</p> <p>Stomp-Head can be used also as a guitar preamp without connecting speaker cabinet. LINE OUT with a speaker cabinet simulation allows the connection of the amplifier to a mixer or an external power amp. LINE OUT signal simulates the sound of the CELESTION Vintage 30 cabinet. Device is also equipped with a serial effect loop.</p> <p>The SH5 design is based on a MTD (Master Tube Design) technology. It is our own groundbreaking technology which permits us to create powerful guitar amplifiers in very compact shape. This technology uses all the significant features of tubes which determine the warm, classic sound of guitar amps. We offer players a fully analog amplifier with extremely light weight, very compact dimensions and powerful sound. The sound characteristics and power of amplifiers based on our MTD technology are equal to the classic tube amps with the same power rating.</p> <p>3 channels - CLEAN, Classic LEAD, High Gain LEAD 5 footswitches CHANNEL 1-2-3, BOOST, MUTE CLEAN CHANNEL - BASS, MIDDLE, TREBLE, GAIN, VOLUME / switches: MID-RANGE BRIGHT CLASSIC LEAD CHANNEL -DRIVE, BASS, MIDDLE, TREBLE, VOLUME / switches: MID-RANGE BRIGHT-DARK HIGH GAIN LEAD CHANNEL - DRIVE, BASS, MIDDLE, TREBLE, VOLUME / switches: MID-RANGE, BRIGHT-DARK MASTER CHANNEL - NOISE GATE, BOOST, MASTER Input GAIN - switch +6dB BOOST - immediate access to two different volume levels Serial effect loop - control</p>
PARAMETERS	
CATEGORY	GUITAR TUBE AMPLIFIER
POWER OUTPUT	90 W
POWER STAGE EFFICIENCY	200 W
TUBES	12AX7
SUPPLY VOLTAGE SELECTOR	230V / 50Hz or 115V / 60 Hz
IMPEDANCE	4 / 8 / 16 ohm

SPEAKERS IMPEDANCE AUTO DETECTION	YES
SERIAL EFFECT LOOP	YES
POWER BRAKE	UP TO 40 W
LINE OUT	LINE OUTPUT WITH LOUDSPEAKER SIMULATION
AUX	-
FOOT-SWITCH	5
MIX-MODE	-
HEIGHT (mm) (in)	90 3,54
WIDTH (mm) (in)	330 12,99
DEPTH (mm) (in)	205 8,07
HEIGHT (kg) (lbs)	2,65 5,84
WARRANTY	2
MANUFACTURER	Taurus products are designed and hand-made in Poland. Adam Kozakiewicz, the founder of Taurus Amplification, musician, sound engineer and electronics engineer, has been providing the market with the best and fully professional music equipment for 35 years. Manual processing and control, guarantee the best quality and full satisfaction.
